

JLG Forklift Part

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV expedition. After spending numerous years establishing his family built crane business with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end result of a road trip.

During their journey, John reacquainted himself with former business associates along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast marketplace for a product that could promptly and securely lift people in the air to accomplish upkeep and other construction services.

Upon returning from their travels, John established a joint venture with two friends and purchased a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they created and sold the first JLG aerial work platform. The business incorporates some of the basic design essentials of that original lift into existing models.

JLG forklifts have come a ways since Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. Nowadays, the company proudly continues to expand itself into different marketplaces worldwide and develops new products to make sure clients are capable of being more effective and perform in the workplace within a safer atmosphere.
